

OUR TIMELINE - DESIGN MASTERPLAN

Design Planning

Our Design Masterplan offers you a full design plan that you can execute. During the Design Planning Phase of your project we will schedule two creative review meetings. These touch bases are a chance for us to get to know you, your aesthetic preferences, your needs, and to review preliminary selections. During the design planning process we model your space to exact specifications, refine selections, design and quote custom solutions such as furniture and millwork, coordinate with needed tradespeople, and gather material samples. We will schedule an on-site trade day to review your spaces with our trade partners. During our Design Presentation meeting we will present the final design of your space, including fully rendered model and material samples.
